

Dinosaur Profile

Dinosaurs lived millions of years ago. Some dinosaurs ate plants, some ate meat, and some ate a little of both. Using the Nature Exchange, the library or the internet to find your favorite dinosaur! Remember: The more you put into your dinosaur profile, the more points you can earn.

What is the name of your dinosaur?

Describe what your dinosaur looked like.

How big was your dinosaur?

Describe your dinosaur's habitat (where it lives)

Paleontologists are scientists who study dinosaurs, they can tell just by looking at a dinosaur's teeth what it ate.

What did your dinosaur eat?

Draw a picture of what you think your dinosaur's teeth look like

Draw a picture of your dinosaur
