Scientific Drawing

A scientific drawing is a sketch that shows an item in detail to record and communicate its facts and features.

Use your scientist observation skills and examine the object closely so that your sketch is *accurate*. Make it as *big* as possible and add *color*. Add as many *details* as you can. *Explain* your sketch through labels, observations, and questions about what you see.

Write two facts about your object or life form:

1.

2.
